

Can you put something on in the background while I scroll my phone?

Here's a selection of light-hearted comedy series perfect for a fun background watch!

Meet Agent TiVo.

Helping viewers discover, decide, and watch.

Viewers do not always know the exact title, app, channel, genre, or phrase to use. Agent TiVo lets viewers ask the way they think, making it easier to discover content, narrow their options, and get to what they want to watch faster.

THE CHALLENGE

Viewers think in:

People **Quotes** Moments
Half-formed ideas
Sports **Memories**
Moods

For entertainment platforms, every failed search, abandoned browse session, or app-switching moment is a missed opportunity to keep viewers engaged and discovering more content.

HOW AGENT TIVO HELPS

Discover

Find content naturally using voice or text.

Refine

Ask follow up questions and receive personalized recommendations with explanations.

Watch

Launch content, open apps, tune channels, and take action directly from the conversation.

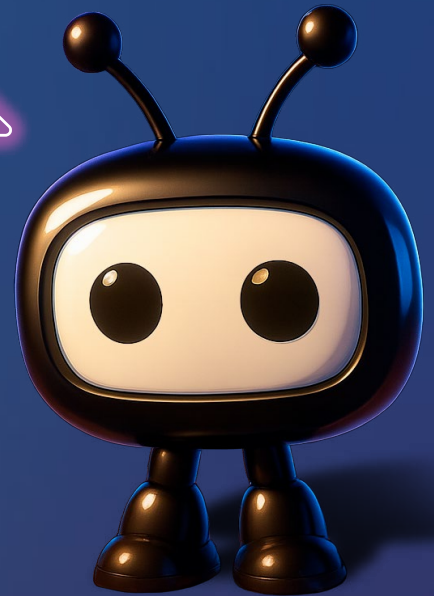

Let Viewers Ask the Way They Actually Think.

Agent TiVo understands natural language and can explain why content is being recommended, helping viewers discover content with greater confidence.

When's the next Liverpool game?

We want a family movie but we're not in the mood for animation.

Find me something to watch that's funny but kind of dark.

THE AGENT TIVO ADVANTAGE

Proven Entertainment Expertise

Optimized for performance in the entertainment domain, unlike generalized AI assistants.

Brand Control

Fully white-labeled to reflect your brand, content strategy, and user experience.

Hybrid Architecture

Intelligent model routing controls costs and minimizes latency.

Predictable Costs

Pay a simple monthly fee per user and let TiVo manage the LLM complexity.

Seamless Integration

Extends existing TiVo deployments without a major platform overhaul.

Future Ready

Designed to evolve with support for new languages, AI capabilities, and use cases.

PROVEN AT SCALE

19

languages supported

30

countries deployed

290M+

voice queries annually

AI BUILT FOR ENTERTAINMENT.

Built on proven discovery expertise, Agent TiVo helps entertainment platforms deliver conversational AI experiences that are scalable, deployable, and designed specifically for entertainment.
