

Can you put something on in the background while I scroll my phone?

Here's a selection of light-hearted comedy series perfect for a fun background watch!

Meet Agent TiVo.

Helping viewers discover, decide, and watch.

Viewers do not always know the exact title, app, channel, genre, or phrase to use. Agent TiVo lets viewers ask the way they think, making it easier to discover content, narrow their options, and get to what they want to watch faster.

Content Choice Has Grown. Discovery Is More Complex.

Viewers have to move between **live TV, on demand, streaming apps, recordings, sports, and subscription libraries**. When they are ready to watch, they are expected to know where to look, what to type, or which app to open.

In reality, people think in moments, moods, people, sports, quotes, memories and half-formed ideas. For entertainment platforms, this friction matters. Every failed search, abandoned browse session, or app-switching moment is a missed opportunity to keep viewers engaged within the experience.

Agent TiVo makes discovery feel more natural, helping viewers find something to watch even when they don't know exactly what to search for.

From Discovery to Action in a Single Conversation.

Agent TiVo goes beyond content discovery to help viewers take action. From launching content and opening apps to managing recordings or controlling playback, viewers can complete common tasks naturally through conversation. The result is a faster, more intuitive entertainment experience with fewer clicks and less navigation.

Discover it

Find content by title, genre, actor, episode, source, sports, and more.

Personalize it

Refine results and receive personalized recommendations through ongoing conversations that adapt to viewer preferences.

Watch it

Launch playback, tune channels, and open apps directly from the conversation.

Control it

Manage playback, recordings, settings, and TV functions without navigating multiple menus.

When's the next Liverpool game?

Liverpool play Arsenal at 4pm on Sunday.

Record it.

Done!

Deploy with Confidence.

Agent TiVo brings conversational AI to entertainment platforms without requiring them to start from scratch or take on the cost and complexity of LLM-only solutions. Built on TiVo's proven voice, discovery, and personalization capabilities, it helps deliver intuitive viewer experiences while maintaining control over branding, content experiences, and platform evolution.

PROVEN AT SCALE

A decade of entertainment-focused voice and discovery expertise

TiVo Voice powers millions of viewer interactions every day.

19

languages supported

30

countries deployed

290M+

voice queries annually

THE AGENT TIVO ADVANTAGE

Proven Entertainment Expertise

Optimized for performance in the entertainment domain, unlike generalized AI assistants.

Brand Control

Fully white-labeled to reflect your brand, content strategy, and user experience.

Hybrid Architecture

Intelligent model routing controls costs and minimizes latency.

Predictable Costs

Pay a simple monthly fee per user and let TiVo manage the LLM complexity.

Seamless Integration

Extends existing TiVo deployments without a major platform overhaul.

Future Ready

Designed to evolve with support for new languages, AI capabilities, and use cases.

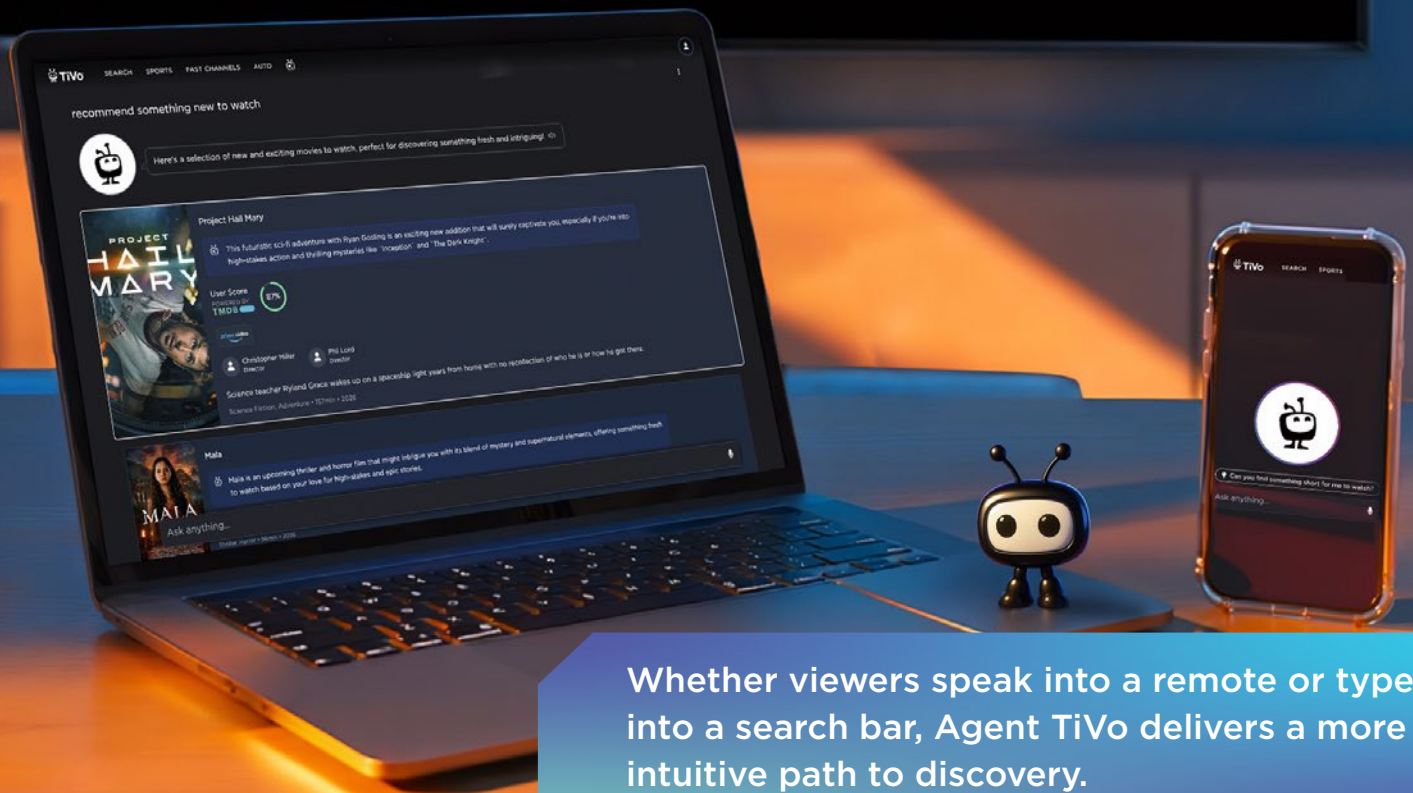

Beyond TV: Conversational Search Everywhere

Powering next-generation text search experiences

Viewers increasingly discover entertainment on laptops, tablets, and mobile devices, where traditional keyword search is no longer enough.

Agent TiVo enables conversational content discovery across streaming services and entertainment platforms, helping users:

- Search naturally using everyday language
- Discover content faster across large catalogs
- Refine results through follow-up questions
- Move beyond traditional title-only search experiences

Whether viewers speak into a remote or type into a search bar, Agent TiVo delivers a more intuitive path to discovery.

AI BUILT FOR ENTERTAINMENT.

Built on proven discovery expertise, Agent TiVo helps entertainment platforms deliver conversational AI experiences that are scalable, deployable, and designed specifically for entertainment.
